

Atlas-Nuclear

The AI Cognitive Operating System for the Nuclear Industry

Marty Yavorcik
Founder & CEO

AI Needs Electricity

Artificial intelligence is creating unprecedented demand for reliable, around-the-clock electricity.

Small modular reactors can help meet that demand.

Nuclear Is Too Complex

- Millions of pages of regulations
- Long licensing timelines
- Complex engineering decisions
- Loss of institutional knowledge
- High project risk

Meet Atlas-Nuclear

An AI cognitive operating system built specifically for the nuclear industry.

Atlas helps organizations reason through licensing, engineering, compliance, and deployment decisions.

What Atlas Does

- Regulatory reasoning
- Engineering reasoning
- Licensing support
- Construction planning
- Operational readiness
- Requirements traceability

Why Atlas Wins

- Purpose-built for nuclear
- Transparent, explainable AI
- Evidence-backed reasoning
- Private enterprise deployment
- Covers the entire nuclear lifecycle

Who We Serve

- Utilities
- SMR developers
- EPC firms
- Engineering companies
- Government agencies
- Energy infrastructure owners

How We Build A Business

- Enterprise licensing
- Annual subscriptions
- Pilot programs
- Professional services
- Strategic partnerships

Our Vision

Accelerate the safe deployment of nuclear energy by providing the trusted cognitive operating system for the nuclear industry.

The Ask

Seeking:

- Pilot customers
- Strategic partners
- Mentors
- Investors

Let's build the future of nuclear intelligence together.
